

GET FRANCHISE CAPITAL

Who We Are

Get Franchise Capital provides franchise owners with the newest and easiest way to get money for their business – a merchant cash advance. Get Franchise Capital is an alternative working capital solution that helps franchises leverage a rarely used asset, their future credit card receivables.

How It Works

- *We purchase a fixed dollar amount of your expected future credit card sales from your customers at a discount.*
- *The money is then wired into your account based on those expected future sales.*
- *A fixed percentage of each future credit card sale is repaid until the original amount is reached.*

How We Are Different From a Bank

- *Unlike small business loans, our unsecured cash advance does not require collateral or a personal guarantee.*
- *No fixed payback period. It's simply an advance against your future credit card receipts. So, in good months when receipts are high, your advance gets paid back faster. And in slow months, when receipts are low, your advance gets paid off more slowly.*
- *Our application process is simple and hassle free.*

Features

Get up to \$200,000 per location
High approval rate
